

HEALTH SERVICES

Hon. Ali Isa JC, PhD, a member with a heart of humility towards his constituents, always puts humanity before any other desire. The area of healthcare stands as one of his priorities, ensuring that health is part of the welfare package he provides to his people.

Upon assuming office, programmes such as medical outreaches were conducted in both Balanga LGA and Billiri LGA to provide drugs and treatment to patients suffering from various kinds of illnesses. Those who required surgery were also operated on, treated, and given medication under close medical observation. Eyeglasses were provided to those with visual impairments, and some underwent eye surgery with recovery of sight.

The healing of other sicknesses was also recorded. This was a remarkable achievement recorded at the beginning of

his assumption of office. However, the bill to establish an Orthopaedic Hospital in Billiri attracted his attention when attempting to continue with his predecessor's bill to establish a Federal Medical Centre in Billiri, which was not achievable to continue pursuing. The Orthopaedic Hospital bill passed third reading and received presidential assent. It was gazetted in the National Gazette and became an established law of the Federation.

This can be traced with evidence of a temporary physical site with visible structures at the location. Ambulances were distributed, and new healthcare facilities in different wards were provided, with picture evidence. Access roads to some existing health facilities were also provided. Beds and other medical facilities were equally supplied.

WOMEN & YOUTHS EMPOWERMENT

Hon. Ali Isa JC PhD has performed extremely well in the area of empowering the youth of his constituency. He diversifies the process to give the beneficiaries a choice to make for the various skills available to equip themselves in areas like; Shoe making, Content creation, dry season farming, Fashion design, etc. beneficiaries were picked in different wards and were trained to stand out best in the society where many competitors of those trade existed. Beneficiaries were not left to only acquire knowledge, but were also given tools of various trades to enable them establish and further extend such

knowledge to youths of their communities. However, these great ideas that the honorable has introduced have helped to curb youth's unrest within the society since they are engaged in a profitable venture. Also jobs were secured to many youth to help them start a career in area of their specialty and in different government establishments. The social media of the honorable were not left out in his empowerment program. The beneficiaries immensely benefited through the content creation training and a provision of Smart phone Infinix (smart 9) to aid their work and boost their capacity.

■ EMPOWERING CITIZENS: *Creating Opportunities*

“ Empowering our people is not just a policy ,
it is a moral obligation. We are
creating opportunities for self-reliance and
sustainable development ”

PROVISION OF CARS, MOTORCYCLE AND GENERATORS FOR THE CONSTITUENTS

ROAD PROJECTS

Road infrastructure is a critical driver of economic growth, social integration, and access to essential services. Understanding that well-constructed and motorable roads enhance mobility, boost trade, and improve the quality of life of the people, Hon. Ali Isa JC, PhD has made road construction and rehabilitation a central focus of his development agenda. These

interventions are aimed at opening up rural and urban communities, reducing travel time, improving safety, and facilitating access to markets, schools, healthcare facilities, and other public services. Each project is informed by community needs, technical standards, and a commitment to durability and long-term impact.
